

POSTER PRESENTATION: YOUR PROJECT TRAILER

YOU are the Director of your CAP Project!

What do you want viewers to see in your project *movie trailer*?

Use the guide below to help you prepare a 2 minute "trailer" that summarizes your CAP project for your showcase audience.

Trailer Topics	The need/issue addressed (why should someone care about this?)
	What you did (1-3 steps)
	The outcome/impact of your project (1-3 takeaways)
Potential Questions you Might be Asked	What did you learn?
	What did you enjoy most about your project? What were some challenges?
	What are possible future directions for your project?

You will present your poster at the CT Science Center during a 30 minute session, sharing your project with attendees as they stroll through the exhibition area.

Expect to present to about 6-8 different groups as folks walk around and visit all the posters. *Being prepared in advance will make it easier for you to share the highlights of your project in the short time you have with your audience.*
