

## ECO-DIGITAL STORYTELLERS

FALL/WINTER 2024

- **Student-teacher teams** attend **3 full-day field trips** to learn about effective **storytelling** and how to apply innovative **mapping** and **digital media technology** to spotlight important community environmental issues.
- UConn faculty assist in facilitating **collaboration with relevant local organizations** and support educators in carrying out classroom activities such as **envisioning the future** and developing **concept pitch** presentations.

SPRING 2025

- With the help of UConn **undergraduate mentors**, teams create a compelling community-focused environmental story using **student-generated media** such as film, photos, interactive maps, and animation.
- A **showcase event** at the end of the program includes 1) a career panel of professionals in environmental, geospatial, and digital media fields and 2) an exhibition of the teams' environmental storytelling projects.

bus transportation  
& lunch provided!

Participating  
teachers receive a  
paid stipend!
